A trust badge that converts - free.

An independent, audited TrustScore floating on your store builds confidence at the exact moment of doubt - checkout.

For your buyers, two conversion flows:

1. They land on YOUR site. They see the verified TrustScore badge, confidence builds, and they are far more comfortable spending money.
2. They arrive FROM ViralPeps. We send you buyers already carrying independent verification and trust - they arrive pre-sold.

The build-it-from-scratch advantage

We are a pioneer building a trust standard for this industry from the ground up. Legitimate sellers want it - almost all say yes. The more verified stores we onboard, the more comfortable buyers become buying online at all. That lifts the whole market, and you are in on the start of it.

What is TrustScore?

An independent 0-100 ranking of how transparent and verifiable a UK supplier is.

The ranking, simply

Each supplier is scored out of 100 across the signals buyers actually care about.

Signal	Max pts
Label / lab results (COA)	25
Genuine reviews	10
Live contact	10
Tracked shipping	5
Research-use compliance	5
Free TrustScore widget on your site	20
Verified business identity	+10 to +25

How customers use it

1. On your site: buyer sees the badge, confidence builds, conversion rises.
2. From ViralPeps: buyer arrives carrying verification and trust - pre-sold.

Independent trust-badge studies show verified stores lift conversion by roughly 10-30%. Every verified signal removes a reason to hesitate - and hesitation is where sales are lost.

Where you sit today

Every supplier starts with a score. Here is the gap between where you are and the top band.

Your store, scored independently

Your TrustScore is calculated automatically from what you already publish - COA, reviews, shipping, contact, compliance. No cost, no work from you.

Your score today: XX / 100 (placeholder - appears once you claim your profile)

Why push for the highest score you can earn

A higher score means higher conversions. Every point lifts you up the bands and past competitors. And here is the constant: buyers gravitate to the store that proves it - not the one that just claims it. The verified business signal is the difference between blending in and standing out.

PAGE 07

Independent - not pay-to-win

Our credibility is the product. We protect it.

- Scores are never for sale. You cannot buy points.
- Automated signals (COA, reviews, contact, shipping, compliance) cannot be bought or gamed.
- The highest-paying shop does not get the highest score - the most verifiable one does.
- A store at 55 outranks a store at 45 that pays more. Verifiably, and publicly.
- Published methodology. Full transparency on how every score is built.

Proof of the model

21 of the 61 UK suppliers we track already publish a verifiable registered business. Almost all want the legitimacy we offer - that is why the founder early-adopter wave is moving fast.
